ABEL SEYUM

COMPUTER SCIENCE | GIS & GPS TESTING | HARDWARE VALIDATION | AI DATA COLLECTION

abel.mrex@gmail.com | 206-697-9955 | Seattle, WA | linkedin.com/in/abel-seyum-262113ab

SUMMARY

Computer Science and GIS professional experienced in GPS hardware validation, functional testing, route-to-market mapping, spatial data quality, AI visual data collection, digital design, and technical troubleshooting. Skilled in evaluating GPS devices, documenting test results and failures, preparing GIS datasets, and supporting field deployment. Additional experience collecting image and video data for AI and computer-vision projects.

PROFESSIONAL EXPERIENCE

Transit Operator, King County Metro Transit | Seattle, WA *2024 – Present*

- Provide safe, professional public transportation service while following operating procedures and communicating with customers and operations staff.
- Complete operational and incident documentation and support accessibility needs during service.

Social Media Content Creator, Graphic Design, GIS & Web Development, YDCT Pictures | United States *Jan 2024 – Present*

- Create visual content for branding, marketing, and social media for individuals and small businesses.
- Use AI-assisted design, photo editing, promotional graphics, logos, and website visuals to deliver client-focused digital content.
- Collaborate with clients to understand requirements and deliver polished work on schedule.

AI Data Collection Participant, iSoftStone | Bellevue, WA *Jan – Feb 2025*

- Collected video and image data for the Everyday Moments Video Collection project supporting AI and computer vision.
- Followed structured capture and submission procedures to meet project quality requirements.
- Reviewed frontal and side-view image submissions for quality, positioning, accuracy, and compliance.

Route to Market (GIS) Developer & Graphic Designer, Wilmar International | Addis Ababa, Ethiopia *Jul 2015 – Jun 2017*

- Developed digital maps using ArcGIS and MapInfo; integrated GPS field data for route-to-market planning.
- Validated GPS hardware using functional, shock/drop, cycle, and environmental testing before deployment.
- Tested satellite connectivity, location accuracy, power operation, and overall device performance.
- Documented hardware failures and test results; prepared devices and supported field teams.

Route to Market GIS Designer, Coca-Cola Sabco | Addis Ababa, Ethiopia *Oct 2014 – Jul 2015*

- Tested GPS devices for signal, location accuracy, connectivity, power, and data capture; troubleshot hardware and transfer issues.
- Cleaned and validated GPS data; developed GIS datasets, shapefiles, and route maps using ArcGIS, MapInfo, and OpenStreetMap.
- Trained field teams in GPS operation, troubleshooting, GIS data collection, and mapping procedures.

AI Visual Designer & Digital Artist, YDCT Pictures | United States *Feb 2018 – Present*

- Develop cinematic visuals, digital art, posters, and social media graphics for digital platforms.
- Use AI-assisted imagery and creative design techniques to support branding and marketing.

Graphic Designer & Digital Machine Operator, Iprint Digital Advertising | Addis Ababa, Ethiopia *Jan – Jun 2014*

- Operated digital printing machinery and performed color calibration, registration, and quality-control checks.
- Managed work orders and schedules and troubleshot equipment issues to maintain workflow.

SKILLS

GPS hardware testing, functional testing, hardware validation, shock/drop testing, cycle and environmental testing, test documentation, troubleshooting, GIS and spatial data, ArcGIS, MapInfo, OpenStreetMap, GPS data, shapefiles, data validation, AI/computer-vision data collection, image/video quality review, HTML/CSS/JavaScript fundamentals, MS Office, graphic and web design

EDUCATION

Bachelor's Degree, Computer Science | Haramaya University | 2008–2012

Information Technology | Microlink Information Technology College | 2005–2008

CodeSquad Mini Course – Web Development | CodeSquad.org
